

CREATING A JITSI MEET ROOM AND SHARING THE LINK WITH OTHERS

Jitsi Meet, by default, does not require an account for joining or starting meetings. You can simply go to meet.jit.si or a self-hosted Jitsi Meet instance and create or join a meeting.

1. Go to **meet.jit.si**

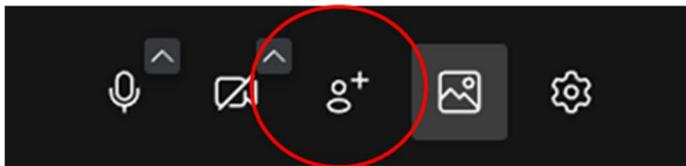

You will see a white text box where you will type in the meeting name.

Once you've typed in the name of your meeting click on the **Start meeting** button to begin.

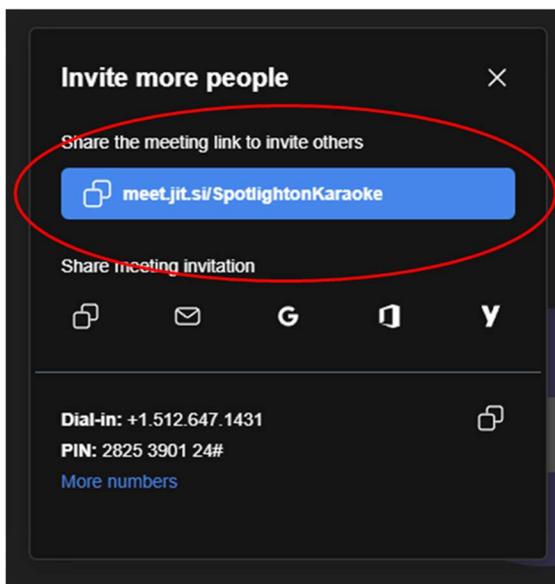

2. Click the middle button below the Join meeting button.

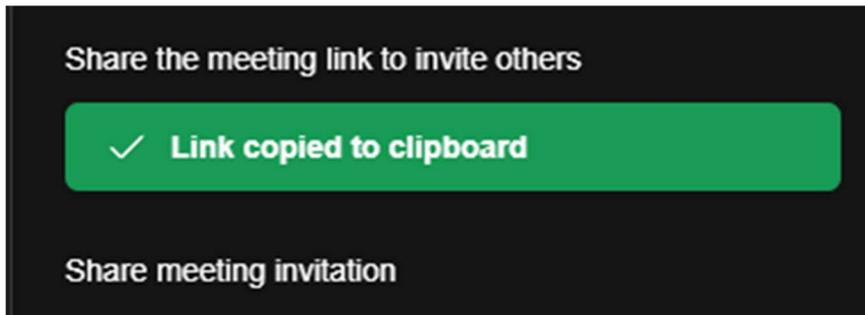

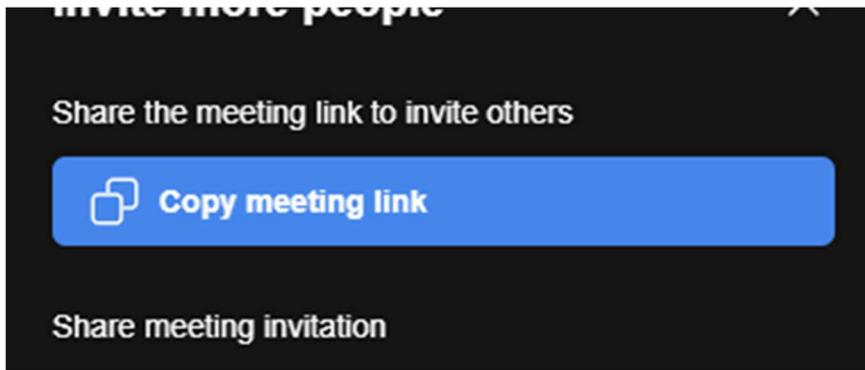

This button is to get the link for inviting others to your meeting.

3. You will be taken to a page where the meeting link appears.

Click on the icon to the left of the link address to copy the address to the clipboard (temporary memory).

You will see a verification that the link has been copied to the clipboard. You will need to paste the link and save it to have it for later use.

BOOKING A MODERATED MEETING

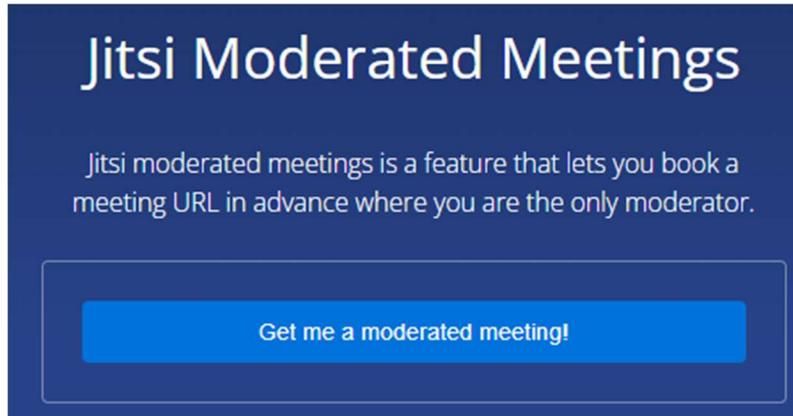

You can also book a meeting URL in advance where you are the only moderator.

1. Begin by clicking on **the book a meeting URL** link.

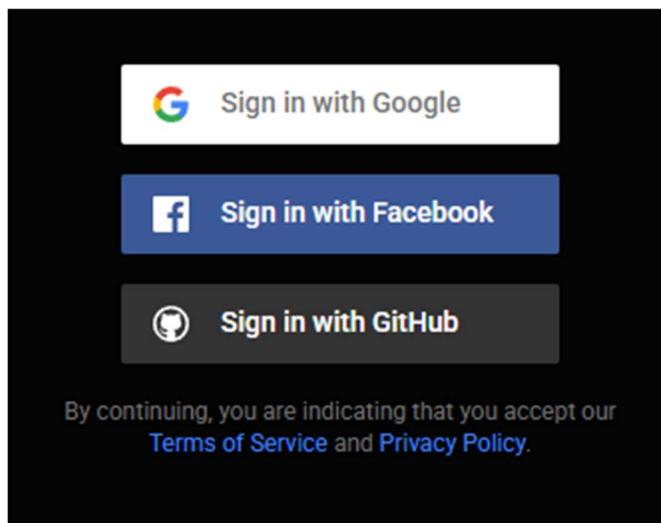

You will be taken to a page that explains what a Jitsi Moderated Meeting is.

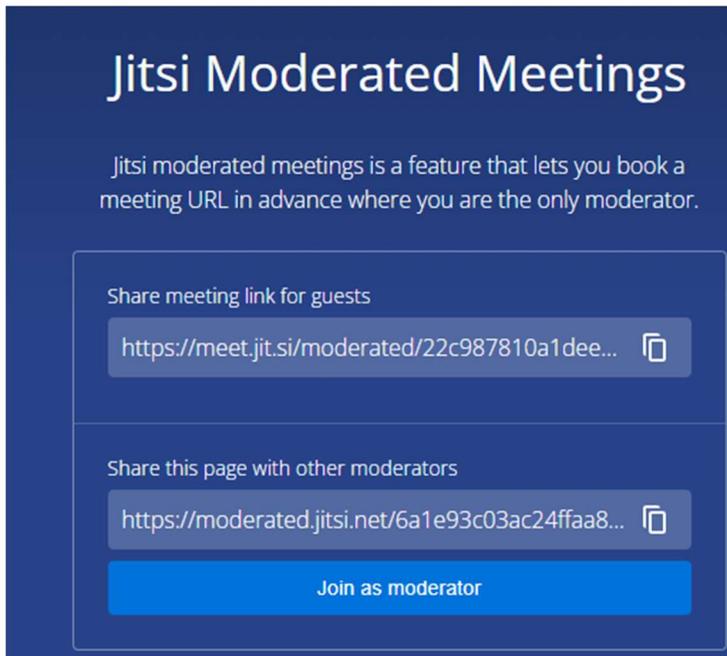

2. Click the **Get me a moderated meeting** button to continue.

3. You will be asked to sign in with either Google, Facebook, or GitHub

4. Once signed in you will be taken to a page that gives you a link to share as well as the option to share the page you are currently on with other moderators.

5. Click the Join as moderator button to begin your meeting.
